CONNECTing Data Integration Logic Model – last updated 11/22/2017

Vision: Improve statewide data sharing through a user-driven process across child serving sectors to drive planning, policy, budgeting and decision making to transform local, regional and statewide networks of care.

Goal: Create an open, accessible, transparent and publicly available data system that is useful, understandable and user friendly.

CONTEXT

Families in Connecticut do not have access to data regarding characteristics of their community or outcomes of publicly funded services

INPUTS

Family & Youth Leadership and Voice

Favor, Inc.

Office of Policy and Management (OPM)

Connecticut Data Collaborative

Beacon Health Options

Child Health and Development Institute

PL 13-178 Advisory Board

Department of Children and Families

Child Serving State Agencies

Yale Consultation Center

SAMHSA

ACTIVITIES/STRATEGIES

Family & Youth Engagement

Recruit and retain family and community participants

Hold regional meetings state to share workgroup updates & hear from families, providers, & communities about data needs

Workforce Development

Develop Data Training series for family champions & conduct ongoing trainings in each region of the state

Develop trainings & implement the CT Data Academy Project

Train family members, community & staff to use CT Data Collaborative website

System Organization, Financing & Accountability

Collaborate with OPM to support the Governor's Open Data Policy Executive Order & the development of the Open Data Portal website

Identify state agency data & barriers to sharing data

Develop work plan with timeline to obtain 20 desired datasets

Identify & report out on aggregated data requests

Support the CT Data Collaborative & the development of a statewide behavioral health data dashboard

Convene regular meetings with state agency staff and Family Champions to review & report on state agency dataset availability

Implement metadata training and provide forms for state agencies

OUTPUTS

Family and Youth Engagement
#family champions attending statewide workgroup meetings/regional meetings
# of regional meetings to share updates

Workforce
family members trained in understanding data
professionals/organizations trained in Data Basics
data trainings provided through CT Data Collaborative
of data trainings provided through FAVOR

System Organization, Financing, and Accountability

statewide meetings held

#/% of child serving state agencies attending workgroup meetings

Work plan with timeline to obtain 20 desired datasets developed

#/% of reviews of work plan with state agencies

# of report outs on work plan progress

#/% of child serving state agencies returning metadata forms

#/% child-serving state agencies posting datasets on CT Open Data Portal

#/% of desired datasets obtained

# of additional datasets obtained (e.g., suicide, care coordination, DV)

and type of barriers to sharing of data as reported by state agencies

Create a single unique identifier for children across state agencies

OUTCOMES

Short-term
Increased number of desired datasets made available by participating state agencies

Increased number of state agencies posting data to portal

Intermediate
Increased provider data knowledge

Increased community/family member data knowledge

Increased metadata for desired datasets as measured by hits on website

Increased public availability of desired state agency datasets

Long-term
Increased use of publicly posted data for policy and decision making
